[Principles of Clinical Ethics and Their Application to Practice](#)

Highlights of the Study

• Main principles of ethics, that is beneficence, nonmaleficence, autonomy, and justice, are discussed.

• Autonomy is the basis for informed consent, truth-telling, and confidentiality.

• A model to resolve conflicts when ethical principles collide is presented.

• Cases that highlight ethical issues and their resolution are presented.

• A patient care model that integrates ethics, professionalism, and cognitive and technical expertise is shown.
